The Ultimate Floating Pontoon Dock

Dock Kings ultimate pontoon docks represent the latest advances in both material and manufacturing techniques for constructing High Density Polyethylene (HDPE) Floating pontoon docks. Our dock products are the highest quality floating docks available, at the most competitive prices.

Our HDPE pontoons are made from stress relieved resin to prevent fatigue, brittleness & cracking. Dock Kings structurally designs systems to withstand impact, particularly in variant weather conditions. Our **ICE-TECH** pontoon technology allows Dock Kings systems to freeze in the ice without harm to the structure. These advanced features make our HDPE pontoons the ideal material of choice for floating docks in any environment. Additionally, high tensile strength aids in chemical and animal resistance, and is not susceptible to UV light exposure.

All Dock Kings systems use 18" and 24" diameter pontoons with a 5/8" and 3/4" wall thickness. All our floating dock systems are built using our patent pending, custom welded HPDE support and cross braces that are used for the substructure. This creates a lower center of gravity and better stability in rough conditions.

A Dock Kings floating pontoon dock is a long-term investment that will continue to pay for itself. The Plastic Pipe Institute estimates the service life of HDPE pontoons to conservatively be 50-100 years.

Decking Surface Options

Pressure Treated Cedar Tone
 Western Red Cedar • HDPE Plastic Wood
 Exotic Hardwoods • Aluminum

All Dock Kings systems can be custom designed and constructed to fit any of your requirements. We supply floating pontoons with or without services (electrical, water, cable). Docks for Municipalities, mining companies, complete marinas, boat dock and walkways, fish pens, work platforms, seaplane docks, aqua culture, floating rafts and more.

Experience the **DOCK KINGS** difference!

- Site visits to determine your exact requirements eliminating guess work over the phone.
- HDPE pontoons will not corrode like steel in water.
- Patented Stringer Brackets welded to the pontoons providing extreme stability.
- Double outer skirt – very aesthetic and hides the pontoons from view.
- Dock Kings only uses 1/2" galvanized carriage bolts.
- Individual pontoon lengths of up to 50' and to any width.
- All accessories are available under one roof: gangways, anchors, ladders, strong arms.
- Full Turn-Key delivery available.
- Dock Kings will provide you with the **BEST** system at the **BEST** price with the **BEST** customer service.
